What is Instructional Design

Instructional design, also known as instructional system design (ISD), it can be defined as the creation of instructional materials, modules or lessons.
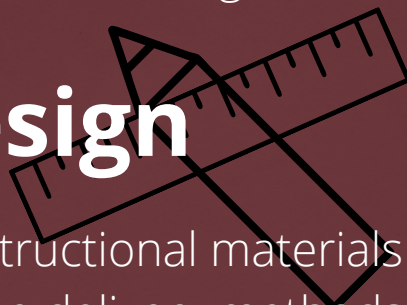

BASIC COMPONENTS

1

Analyze

Gathering information about how the learners will view the content, and the project's overall goals.
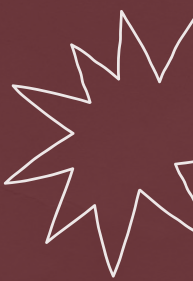

2

Design

Designing the instructional materials or determining the delivery methods to be used

3

Develop

The blueprints of the design phase are assembled. Creating the activities that will be implemented.

4

Implement

Test all materials to determine if they are functional and appropriate for the intended audience.

5

Evaluate

Determining if the project was successful and revise them if necessary.
